Passionate software engineer with a strong focus on **user experience**, performance, and scalability. Enjoys working on data-intensive applications, micro-services, cli-tools, and libraries. Experienced in different programming languages, including *Javascript*, *C++*, *Java*, *Python*, and **Go**; and web-related technologies such as HTML, CSS, Javascript, Elixir, and React.

Education

- **A.S. Computer science**. *2016–2018*
  Houston Community College. United States. Cum Laude graduate

- **B.E. Software engineering**. *2013–2015*
  Universidad Nacional Experimental Táchira. Venezuela

Experience

- **Upwork**. *2015–present*
  Software engineer. Remote.
  Developed multiple open-source libraries and tools. Including a distributed key-value data-store similar to *Redis*, an audio decoding library for real-time audio streaming, and a library for consuming the *Pandora* API.

- **FixComputing**. *2014–2015*
  Full-stack web developer, Venezuela.
  Planned, designed, and implemented multiple websites that enhanced the overall end-user experience; resulting in increased of traffic and user retention.

Skills

- **Experienced in multiple programming languages**.
  With great insight regarding issues of different nature due to years of experience with: *Javascript*(proficient), *C++*(proficient), *Java*(expert), *Python*(proficient), and *Go*(expert).

- **Fast learner and problem solver by nature**.
  Great at adapting to difficult situations on the fly, and learning what is required to get the problem at hand.

- **Good at working in teams**.
  Motivated and used to working fast paced and flexible environments.
